

Stencil Alternative

If you don't currently own a stencil, you can use this to create a homemade one, using the following instructions.

1. Print this document
2. Cut out the outer circle
3. Poke a hole through the center dot, and line up the hole with the center mark on your project
4. Make small marks on your project surface, right beside each of the 8 lines
5. Remove your homemade stencil, grab a ruler and draw out lines going through the center to connect each of your marks
